DETAILED ACTION

1. The restriction mailed on 03/26/03 is withdrawn and a new restriction follows below.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

The present invention teaches one group of subspecies directed to the ink receiving layer (Group A) and another group of subspecies directed to the backing layer (Group B). The subspecies are identified as follows:

Group A:

Subspecies 1A, wherein the ink receiving layer is a transparent alumina sol-gel.

Subspecies 2A, wherein the ink receiving layer is a translucent titania sol-gel.

Group B:

Subspecies 1B, wherein the backing is a liquid backing, as disclosed on page 7 of the specification.

Subspecies 2B, wherein the backing is a sheet, as disclosed on page 9 of the specification.

Art Unit: 2853

To select a species, the Applicant should choose one subspecies from each of the groups (e.g. 1A and 1B) to identify the elected species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2853

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

1. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
